

RESMED

Wake up **to Life**

...with ResMed's **new**
sleep therapy system

S9™ Series
More. Comfort.

www.s9morecomfort.com

A beautiful addition to your lifestyle

ResMed's new sleep therapy system is proof that superb functionality and contemporary design can co-exist beautifully.

This elegant design package provides technological advances that simply deliver more performance and more comfort to your sleep therapy.

Its good looks will complement your bedroom décor. Its exciting array of features is the product of ResMed's global research into your wants and needs.

This understanding has led to a brilliant new sleep therapy system that will help you wake up to life, day after day.

That's so much more from ResMed.

S9™ Series
More. Comfort.

Colour LCD display puts you in command

You're in command from the outset with simple, logical, easy-to-manage controls. A unique colour LCD screen displays all menus and treatment options.

The intuitive layout makes every adjustment simple and more natural.

An easy-to-view Sleep Quality Indicator tracks your treatment and really helps you engage with your sleep therapy.

That's more for you, at the touch of a button.

Climate Control lifts comfort to a new level

This clever new sleep therapy system features an innovation that is exclusive to ResMed.

Climate Control provides the precise temperature and humidification your sleep therapy requires for optimum comfort*.

A clever sensor monitors air close to the mask. As conditions change, Climate Control automatically adjusts, maintaining your absolute comfort.

Simply select your preferred temperature - Climate Control does the rest. The heated ClimateLine tube helps eliminate 'rainout'. It's another way ResMed gives you more.

** Sleep therapy can create the need for added humidification as air pressure may overwhelm the airway's natural mechanism for warming and moistening the air. ResMed's Climate Control is the most sophisticated technological solution available.*

Our new tubes are smaller, slimmer, sleeker

They're more convenient, comfortable and user-friendly. ResMed's exclusive new tubes are 40% lighter and 20% thinner than conventional tubes.

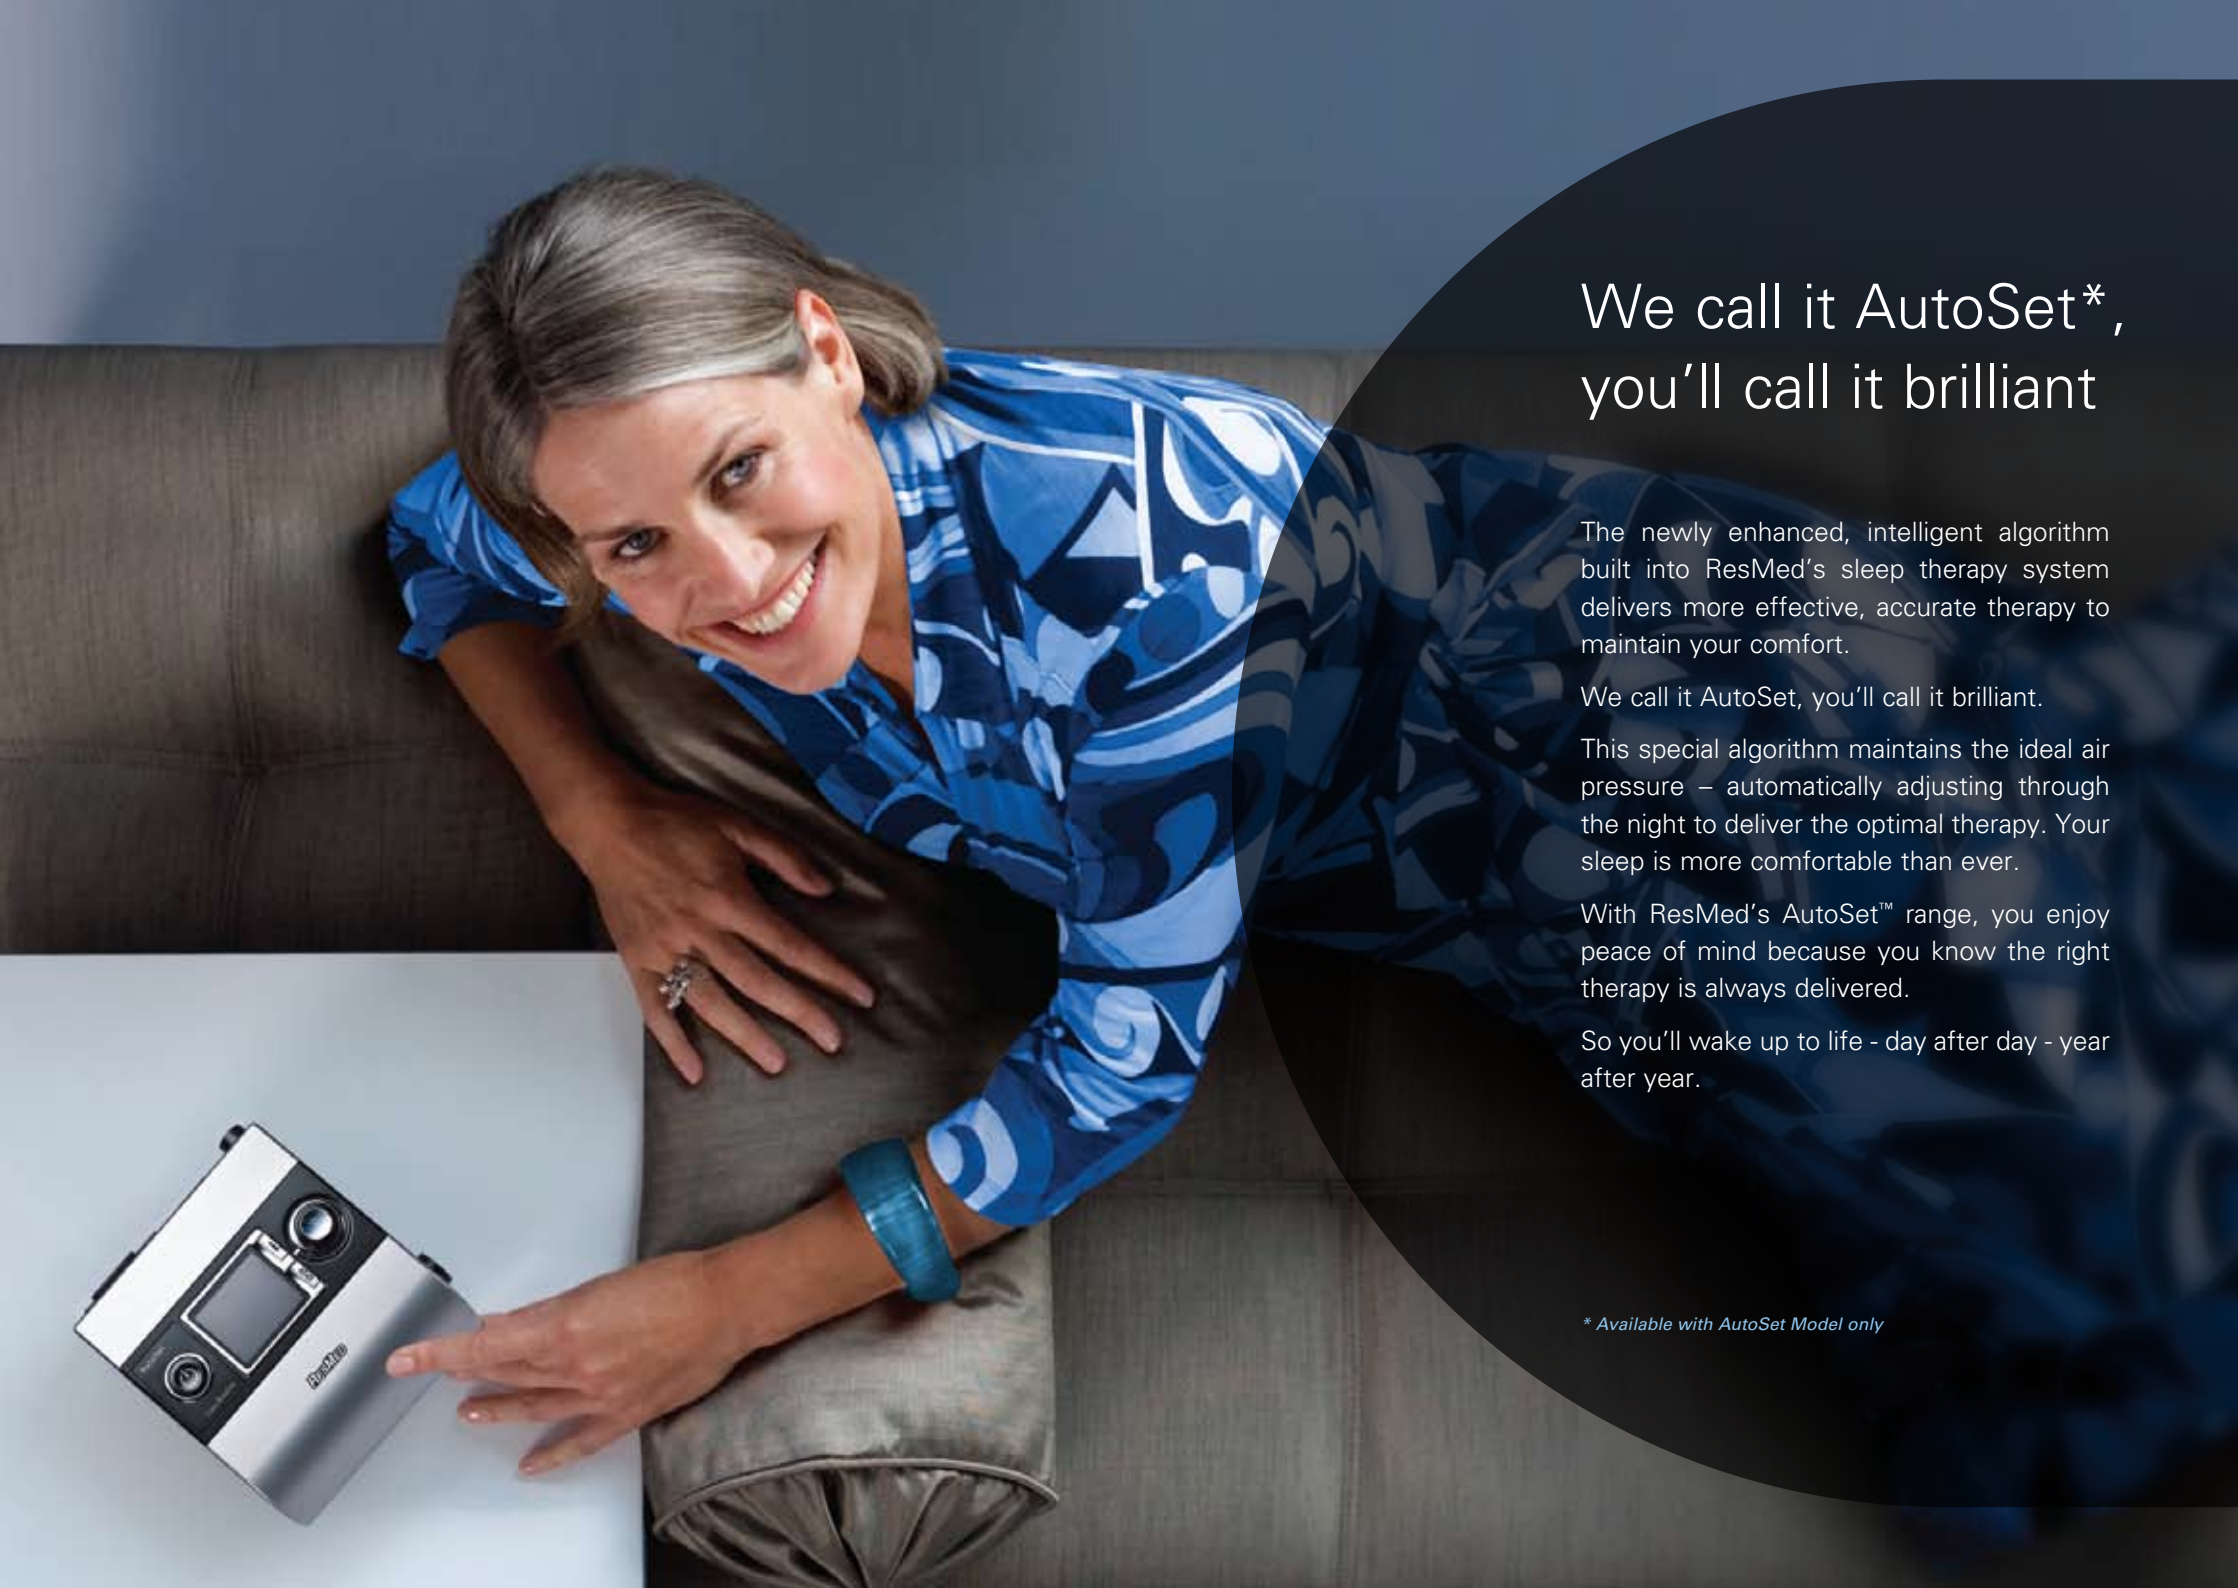

They're the easiest-to-use tubes available, giving you more freedom of movement, and greater sleeping comfort.

Why hasn't somebody thought of this before? They haven't had the performance of ResMed's Easy-Breathe motor to make it all possible.

Less volume and more flexibility means these clever new tubes are also very travel friendly.

In SlimLine or heated ClimateLine, ResMed's exclusive new tubes simply give you more.

We call it AutoSet*, you'll call it brilliant

The newly enhanced, intelligent algorithm built into ResMed's sleep therapy system delivers more effective, accurate therapy to maintain your comfort.

We call it AutoSet, you'll call it brilliant.

This special algorithm maintains the ideal air pressure – automatically adjusting through the night to deliver the optimal therapy. Your sleep is more comfortable than ever.

With ResMed's AutoSet™ range, you enjoy peace of mind because you know the right therapy is always delivered.

So you'll wake up to life - day after day - year after year.

* Available with AutoSet Model only

Now with Central Sleep Apnea Detection

ResMed's new sleep therapy system can now differentiate between obstructive sleep apneas (where the airway is blocked) and central sleep apneas (airway is open but there is no airflow)*.

Each condition requires its own specific therapy.

Once detected, the enhanced AutoSet ensures the appropriate treatment is automatically delivered.

It's another important way ResMed gives you more.

* For more information on the types, causes and treatment of apneas, ask your clinician or visit resmed.com

Shh! It's our brand new motor

At the heart of the system is our enhanced Easy-Breathe motor. While it delivers more performance, it keeps very quiet about it.

In fact it's so quiet, it can barely be heard!

ResMed has long led the way in delivering the quietest therapy.

Our motor employs special new technology to create the most peaceful environment ever – for you and your bed-partner.

It's not only peaceful in the bedroom, it's also silent through the mask.

The new enhanced Easy-Breathe motor proves that more can also mean less.

More. Comfort.

Two words encapsulate the advantages of this brilliant sleep therapy system – more, comfort.

More aesthetic appeal, more ease of use with its intuitive controls and more performance through clever innovations.

The sheer comfort of Climate Control, its whisper-quiet performance and of course, the added reassurance of ResMed's renowned Easy-Breathe technology.

More. Comfort. It's yours from ResMed.
